

Tal Barahi Handicraft – Brand Style Guide

Color Palette

Variable	Color Code	Usage
--primary-color	#8B2C2C	Primary brand color, buttons, highlights
--accent-color	#2B2B29	Text color, icons, accents
--light-bg	#FDF9F7	Page background color
--white	#FFFFFF	Neutral background, elements
--text-light	#666666	Secondary text color
--border-light	#E0D5D0	Borders, dividers
--soft-gray	#F5F5F5	Subtle backgrounds, cards

Typography

Headings use the decorative script font **Passions Conflict**, giving an artisanal and premium feel. Body content uses **Poppins**, a clean sans-serif font for readability and modern aesthetics.

Layout & Spacing

The layout uses a **max-width of 1200px** with generous padding and grid-based design. Spacing between sections and components follows consistent padding and margin rules to maintain a balanced aesthetic.

Buttons

Buttons use soft gradients and rounded corners. Primary CTAs have white/gray backgrounds with bold text. Hover states subtly elevate the button and invert color contrast.

Imagery & Icons

The design uses emojis and SVG for a handcrafted and warm identity. Visuals such as sheep, wool, and decorative motifs reinforce brand storytelling.

Grid System

Sections like product listings and stats use a responsive CSS Grid layout with flexible columns (minmax 300px). This ensures adaptability across devices while keeping content aligned and balanced.
